

FLOOR WASTE

Fire Rated Collars

Injection moulded fire collar with a unique steel blade design developed specifically to be cast into concrete floor slabs underneath drains and grates (i.e floor waste) for the provision of plastic pipe penetrations through fire rated concrete slabs.

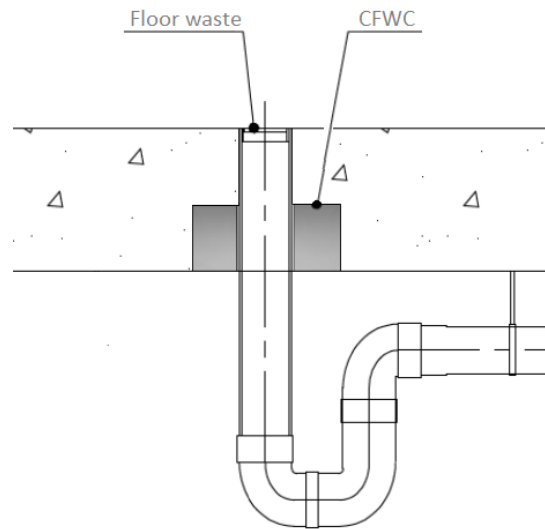

CFWC50

CFWC100

Key Features

- 1 Steel blade design coupled with a high grade intumescent formulation ensures effective fire performance for floor waste applications
- 2 Polypropylene body material gives high moisture resistance and flexural strength
- 3 High grade intumescent formulation for fire performance
- 4 Coupling plate creates a recessed opening in the slab for pipe fittings and elbows
- 5 Tested to meet the requirements of AS1530.4 for PVC, HDPE and RAUPIANO pipes

Pipe material	CFWC50	CFWC100
PVC	50mm	100mm
HDPE	50mm	-
RAUPIANO	50mm	-
Height	75 mm	145mm
Base width x length	160 x 160 mm	230 x 230mm

Fire testing is ongoing to extend product approvals, for more information on these or other passive fire systems please contact Trafalgar Fire on 1800 888 714 or email info@tfire.com.au
